About Mandy Phillips

Before Mandy re-trained and qualified, she had a long and successful career working in IT and Digital, leading many change projects and working with large groups of clients or 'users' as they're called in IT to lead them through change.

Her areas of expertise cover taking paper based systems and making them digital, creating online spaces that engage customers, and she has a real passion for customer experience in all of that. Mandy runs two Facebook community groups (Build a Web Site in 10 Easy-ish Steps & Digital Support for Private Practitioners) where weekly live content is delivered to help therapists get more digital savvy.

Mandy also designs and builds web sites, and offers coaching to those who want to do it themselves but would like a hand to hold along the way.

Tech shouldn't be a barrier to having a thriving business - and it's really not that scary when you make friends with it!
